Subject index

Acid rain
Adsorbed HNO_2/NO redox couple at Pt(111) single-crystal electrode (Ye, Kita) 489
Ac voltammetry
Ac voltammetric measurements of fast charge-transfer processes at ultramicroelectrodes (Winkler, Baranski) 197
Adsorption
Kinetic Ising model in electrochemistry: its general scope and particular applications in adsorption kinetics (Bosco) 433
Adsorption parameters
Adsorption parameters within the unstable region of thymine on the Hg electrode and the problem of the size ratio parameter (Nikitas, Pappa-Louisi) 483
Alzheimer's disease
Electrochemical and enzymatic oxidation of 5-hydroxytryptophan (Humphries et al.) 377
Anodic oxidation
Anodic oxidation of different substituted mono-, bis- and trishydrazines (Abou-Elenien) 367
Anodic oxidative hydrolysis
Preparation of TiO_2 (anatase) films on electrodes by anodic oxidative hydrolysis of $TiCl_3$ (Kavan et al.) 291
Antimony
Anodic oxidation of antimony at high overpotentials — formation of a barrier layer and klebelsbergite (Bojinov, Pavlov) 339

Bioelectrocatalysis
Bioelectrocatalysis at organic conducting salt electrodes. Use of hexamethylenetetratellurafulvalene tetracyanoquinodimethane (HMTTeF–TCNQ) as a versatile electrode material (Zhao, Lennox) 161
Bishydrazine
Anodic oxidation of different substituted mono-, bis- and trishydrazines (Abou-Elenien) 367
Brucella melitensis
Polarographic study of the O-chain lipopolysaccharide of *Brucella melitensis* after labelling as the *N*-maleylamide derivative (Sánchez Pérez et al.) 175

Carbon monoxide
Voltammetric study of the electroadsorption and electrooxidation of CO on Pt in 0.5 M $HClO_4$: influence of several experimental variables (Caram, Gutiérrez) 451
Catalysis
Effect of Tl, Cd and Cu adatoms deposited at underpotentials onto Pd: oxidation of hydrazine (Ritzoulis, Georgolios) 405
Charge-transfer processes
Ac voltammetric measurements of fast charge-transfer processes at ultramicroelectrodes (Winkler, Baranski) 197
Chronopotentiometry
Chronopotentiometry with several types of programmed current at most usual electrodes: general study of systems with coupled first-order chemical reactions (Molina et al.) 53
Cold fusion
Correlation of excess power and helium production during D_2O and H_2O electrolysis using palladium cathodes (Miles et al.) 99
Concentrated amalgams
The application of mercury hemispherical ultramicroelectrodes to the study of very concentrated amalgams. Diffusion coefficients of thallium (Krasiński, Galus) 135
Copper
Characterization of a Pt + Pd alloy electrode

by underpotential deposition of copper (Fiçicioğlu, Kadirgan) 187
Crank–Nicolson
The Crank–Nicolson technique—an efficient algorithm for the simulation of electrode processes at macro- and microelectrodes (Störzbach, Heinze) 1
Current equations
The application of the concept of the steady-state reaction–diffusion layer to a study of the electrode processes with multistep reactions at microelectrodes under steady-state conditions (Zhuang, Chen) 29
Cyclic potential sweep deposition
Origin of the difference between potentiostatic and cyclic potential sweep depositions of polyaniline (Cui et al.) 477

2,6-dephenylpyrylium
Electrochemical reduction of 2,6-diphenylpyrylium cations by spin-polarized electrons on p-GaAs photocathodes (Modestov, Kazarinov) 353
Diffusion
Transport to rough electrode surfaces. Part 2: Perturbation solution for two-dimensional steady state transport to an arbitrary surface under mixed diffusion–kinetic control (Louch, Pritzker) 211
D_2O electrolysis
Correlation of excess power and helium production during D_2O and H_2O electrolysis using palladium cathodes (Miles et al.) 99
Double-layer studies
Solvent effects on the two-dimensional condensation of 2-thiouracil (Wandlowski et al.) 271

Eastman-AQ polymer film
Study on mass transport in Eastman-AQ polymer film by using non-steady-state chronoamperometry at an ultramicrodisk electrode (Che, Dong) 239
Electroadsorption
Voltammetric study of the electroadsorption and electrooxidation of CO on Pt in 0.5 M $HClO_4$: influence of several experimental variables (Caram, Gutiérrez) 451
Electrocatalysis
Electro-oxidation of L-ascorbic acid on platinum in acid solutions: an in-situ FTIRRAS study (Xing et al.) 309
Electrochemical cell calorimetry
The mirage effect: a sensitive probe for electrochemical cell calorimetry (Rosolen et al.) 119
Electrochemical oxidation
Electrochemical and enzymatic oxidation of 5-hydroxytryptophan (Humphries et al.) 377
Electrochemical reduction
Electrochemical reduction of 2,6-diphenylpyrylium cations by spin-polarized electrons on p-GaAs photocathodes (Modestov, Kazarinov) 353
Electrochemical sensors
Electro-oxidation of L-ascorbic acid on platinum in acid solutions: an in-situ FTIRRAS study (Xing et al.) 309
Electromodulated IR reflectance spectroscopy
Integrated electromodulated IR reflectance spectroscopy bands. Part 2: Methanol adsorbates at polycrystalline platinum and Pt(111) single-crystal electrodes in acid medium (Lopes et al.) 415
Electrooxidation
Voltammetric study of the electroadsorption and electrooxidation of CO on Pt in 0.5 M $HClO_4$: influence of several experimental variables (Caram, Gutiérrez) 451
Enzymatic oxidation
Electrochemical and enzymatic oxidation of 5-hydroxytryptophan (Humphries et al.) 377
Exhaust gases
Adsorbed HNO_2/NO redox couple at Pt(111) single-crystal electrode (Ye, Kita) 489

Film growth
Growth of polyaniline films under pulse potentiostatic conditions (Tsakova et al.) 85
First-order kinetics
Transport to rough electrode surfaces. Part 2: Perturbation solution for two-dimensional steady state transport to an arbitrary surface under mixed diffusion–kinetic control (Louch, Pritzker) 211
Foreign metal adatoms
Effect of Tl, Cd and Cu adatoms deposited at underpotentials onto Pd: oxidation of hydrazine (Ritzoulis, Georgolios) 405
Fourier transform IR spectroscopy
Electro-oxidation of L-ascorbic acid on platinum in acid solutions: an in-situ FTIRRAS study (Xing et al.) 309

Gouy–Chapman theory
Test of the Gouy–Chapman theory at a (111) silver single-crystal electrode (Hamelin et al.) 251

Hexamethylphosphotriamide
Electroreduction of nitrobenzene on the mercury electrode in water + HMPA solutions (Kalandyk, Stroka) 323
Hexanuclear clusters
Spectroelectrochemistry of the hexanuclear cluster $[Ru_3O(acetate)_6\text{-}\mu\text{-}(pyrazine)_3\text{-}\{Fe(CN)_5\}_3]^{n-}$ and of its modified nickel electrode in aqueous solution (Toma et al.) 261
HNO_2/NO redox couple
Adsorbed HNO_2/NO redox couple at Pt(111) single-crystal electrode (Ye, Kita) 489
H_2O electrolysis
Correlation of excess power and helium production during D_2O and H_2O electrolysis using palladium cathodes (Miles et al.) 99
Hydrazine
Effect of Tl, Cd and Cu adatoms deposited at underpotentials onto Pd: oxidation of hydrazine (Ritzoulis, Georgolios) 405
5-Hydroxytryptophan
Electrochemical and enzymatic oxidation of 5-hydroxytryptophan (Humphries et al.) 377

Interface characterization
Ac voltammetric measurements of fast charge-transfer processes at ultramicroelectrodes (Winkler, Baranski) 197
Ising model
Kinetic Ising model in electrochemistry: its general scope and particular applications in adsorption kinetics (Bosco) 433

Kinetic parameters
The application of the concept of the steady-state reaction–diffusion layer to a study of the electrode processes with multistep reactions at microelectrodes under steady-state conditions (Zhuang, Chen) 29
Kinetics
Kinetic Ising model in electrochemistry: its general scope and particular applications in adsorption kinetics (Bosco) 433
Klebelsbergite
Anodic oxidation of antimony at high overpotentials — formation of a barrier layer and klebelsbergite (Bojinov, Pavlov) 339

Lipopolysaccharide
Polarographic study of the O-chain lipopolysaccharide of *Brucella melitensis* after labelling as the *N*-maleylamide derivative (Sánchez Pérez et al.) 175

Mass transport
Study on mass transport in Eastman-AQ polymer film by using non-steady-state chronoamperometry at an ultramicrodisk electrode (Che, Dong) 239
Mathematical modelling
The mirage effect: a sensitive probe for electrochemical cell calorimetry (Rosolen et al.) 119
Mercury electrode
Electroreduction of nitrobenzene on the mercury electrode in water + HMPA solutions (Kalandyk, Stroka) 323
Adsorption parameters within the unstable region of thymine on the Hg electrode and the problem of the size ratio parameter (Nikitas, Pappa-Louisi) 483
Mercury electrodes
The application of mercury hemispherical ultramicroelectrodes to the study of very concentrated amalgams. Diffusion coefficients of thallium (Krasiński, Galus) 135
Methanol adsorbates
Integrated electromodulated IR reflectance spectroscopy bands. Part 2: Methanol adsorbates at polycrystalline platinum and Pt(111) single-crystal electrodes in acid medium (Lopes et al.) 415
Microelectrode reactions
The application of the concept of the steady-state reaction–diffusion layer to a study of the electrode processes with multistep reactions at microelectrodes under steady-state conditions (Zhuang, Chen) 29
Microelectrodes
Application of the concept of the reaction layer to the study of multistep-electrode processes at microelectrodes (Zhuang, Chen) 471
Mirage effect
The mirage effect: a sensitive probe for electrochemical cell calorimetry (Rosolen et al.) 119

Monohydrazine
Anodic oxidation of different substituted mono-, bis- and trishydrazines (Abou-Elenien) 367
Multistep-electrode processes
Application of the concept of the reaction layer to the study of multistep-electrode processes at microelectrodes (Zhuang, Chen) 471

Nickel electrode
Spectroelectrochemistry of the hexanuclear cluster $[Ru_3O(acetate)_6\text{-}\mu\text{-}(pyrazine)_3\text{-}\{Fe(CN)_5\}_3]^{n-}$ and of its modified nickel electrode in aqueous solution (Toma et al.) 261
Nitrobenzene
Electroreduction of nitrobenzene on the mercury electrode in water + HMPA solutions (Kalandyk, Stroka) 323
N-maleylamide derivative
Polarographic study of the O-chain lipopolysaccharide of *Brucella melitensis* after labelling as the *N*-maleylamide derivative (Sánchez Pérez et al.) 175
Non-steady-state chronoamperometry
Study on mass transport in Eastman-AQ polymer film by using non-steady-state chronoamperometry at an ultramicrodisk electrode (Che, Dong) 239

Optical orientation
Electrochemical reduction of 2,6-diphenylpyrylium cations by spin-polarized electrons on p-GaAs photocathodes (Modestov, Kazarinov) 353
Organic conducting salt electrodes
Bioelectrocatalysis at organic conducting salt electrodes. Use of hexamethylenetetratellurafulvalene tetracyanoquinodimethane (HMTTeF–TCNQ) as a versatile electrode material (Zhao, Lennox) 161
Oxidation
Anodic oxidation of antimony at high overpotentials — formation of a barrier layer and klebelsbergite (Bojinov, Pavlov) 339

Palladium
Correlation of excess power and helium production during D_2O and H_2O electrolysis using palladium cathodes (Miles et al.) 99
Palladium electrodes
Effect of Tl, Cd and Cu adatoms deposited at underpotentials onto Pd: oxidation of hydrazine (Ritzoulis, Georgolios) 405
Perturbation
Transport to rough electrode surfaces. Part 2: Perturbation solution for two-dimensional steady state transport to an arbitrary surface under mixed diffusion–kinetic control (Louch, Pritzker) 211
Platinum
Integrated electromodulated IR reflectance spectroscopy bands. Part 2: Methanol adsorbates at polycrystalline platinum and Pt(111) single-crystal electrodes in acid medium (Lopes et al.) 415
Voltammetric study of the electroadsorption and electrooxidation of CO on Pt in 0.5 M $HClO_4$: influence of several experimental variables (Caram, Gutiérrez) 451
Polarographic study
Polarographic study of the O-chain lipopolysaccharide of *Brucella melitensis* after labelling as the *N*-maleylamide derivative (Sánchez Pérez et al.) 175
Polyaniline
Origin of the difference between potentiostatic and cyclic potential sweep depositions of polyaniline (Cui et al.) 477
Polyaniline films
Growth of polyaniline films under pulse potentiostatic conditions (Tsakova et al.) 85
Potentiostatic deposition
Origin of the difference between potentiostatic and cyclic potential sweep depositions of polyaniline (Cui et al.) 477
Probe beam deflection
The mirage effect: a sensitive probe for electrochemical cell calorimetry (Rosolen et al.) 119
Programmed current
Chronopotentiometry with several types of programmed current at most usual electrodes: general study of systems with coupled first-order chemical reactions (Molina et al.) 53
Prussian blue
Topographical imaging of Prussian Blue surfaces by direct-mode scanning electrochemical microscopy (Sugimura et al.) 147
Pt + Pd alloy
Characterization of a Pt + Pd alloy electrode by underpotential deposition of copper (Fiçicioğlu, Kadirgan) 187

Pt single crystal
Adsorbed HNO_2/NO redox couple at Pt(111) single-crystal electrode (Ye, Kita) 489
Pulse electrolysis stopped flow
Resonance Raman measurement of electrochemically generated short-lived intermediates by means of a pulse electrolysis stopped flow method (Oyama et al.) 281
Pulse potentiostatic conditions
Growth of polyaniline films under pulse potentiostatic conditions (Tsakova et al.) 85

Reaction–diffusion layer
The application of the concept of the steady-state reaction–diffusion layer to a study of the electrode processes with multistep reactions at microelectrodes under steady-state conditions (Zhuang, Chen) 29
Reaction layer concept
Application of the concept of the reaction layer to the study of multistep-electrode processes at microelectrodes (Zhuang, Chen) 471
Refractive index
The mirage effect: a sensitive probe for electrochemical cell calorimetry (Rosolen et al.) 119
Resonance Raman spectroscopy
Resonance Raman measurement of electrochemically generated short-lived intermediates by means of a pulse electrolysis stopped flow method (Oyama et al.) 281
Rough electrode surfaces
Transport to rough electrode surfaces. Part 2: Perturbation solution for two-dimensional steady state transport to an arbitrary surface under mixed diffusion–kinetic control (Louch, Pritzker) 211

Scanning electrochemical microscopy
Topographical imaging of Prussian Blue surfaces by direct-mode scanning electrochemical microscopy (Sugimura et al.) 147
Short-lived intermediates
Resonance Raman measurement of electrochemically generated short-lived intermediates by means of a pulse electrolysis stopped flow method (Oyama et al.) 281
Silver electrodes
Test of the Gouy–Chapman theory at a (111) silver single-crystal electrode (Hamelin et al.) 251
Single-crystal electrodes
A model for the effect of roughness of single-crystal electrodes on Parsons–Zobel plots (Foresti et al.) 73
Solvent effects
Solvent effects on the two-dimensional condensation of 2-thiouracil (Wandlowski et al.) 271
Spectroelectrochemistry
Spectroelectrochemistry of the hexanuclear cluster $[Ru_3O(acetate)_6\text{-}\mu\text{-}(pyrazine)_3\text{-}\{Fe(CN)_5\}_3]^{n-}$ and of its modified nickel electrode in aqueous solution (Toma et al.) 261
Spin-polarization
Electrochemical reduction of 2,6-diphenylpyrylium cations by spin-polarized electrons on p-GaAs photocathodes (Modestov, Kazarinov) 353
Surface characterization
Topographical imaging of Prussian Blue surfaces by direct-mode scanning electrochemical microscopy (Sugimura et al.) 147
Characterization of a Pt + Pd alloy electrode by underpotential deposition of copper (Fiçicioğlu, Kadirgan) 187
Surface roughness
A model for the effect of roughness of single-crystal electrodes on Parsons–Zobel plots (Foresti et al.) 73

Thallium
The application of mercury hemispherical ultramicroelectrodes to the study of very concentrated amalgams. Diffusion coefficients of thallium (Krasiński, Galus) 135
2-Thiouracil
Solvent effects on the two-dimensional condensation of 2-thiouracil (Wandlowski et al.) 271
Thymine
Adsorption parameters within the unstable region of thymine on the Hg electrode and the problem of the size ratio parameter (Nikitas, Pappa-Louisi) 483
TiO_2 films
Preparation of TiO_2 (anatase) films on electrodes by anodic oxidative hydrolysis of $TiCl_3$ (Kavan et al.) 291
Topological imaging
Topographical imaging of Prussian Blue surfaces by direct-mode scanning electrochemical microscopy (Sugimura et al.) 147

Trishydrazine
Anodic oxidation of different substituted mono-, bis- and trishydrazines (Abou-Elenien) 367
Two-dimensional condensation
Solvent effects on the two-dimensional condensation of 2-thiouracil (Wandlowski et al.) 271

Ultramicroelectrodes
Ac voltammetric measurements of fast charge-transfer processes at ultramicroelectrodes (Winkler, Baranski) 197
Underpotential deposition
Characterization of a Pt + Pd alloy electrode by underpotential deposition of copper (Fiçicioğlu, Kadirgan) 187

Water
Electroreduction of nitrobenzene on the mercury electrode in water + HMPA solutions (Kalandyk, Stroka) 323
